

**SYSTEM AND METHOD FOR RECORDING THE ORDER OF A CHANGE
CAUSED BY RESTORING A PRIMARY VOLUME DURING ONGOING
REPLICATION OF THE PRIMARY VOLUME**

Anand A. Kekre
Niranjan S. Pendharkar

ABSTRACT OF THE DISCLOSURE

[0074] A method may involve replicating a first change made to a primary volume. The first change is replicated to a secondary volume. A second change made to the primary volume is also replicated to the secondary volume. The second change is caused by a restore operation. Replicating the second change to the secondary volume involves recording an order of the second change relative to the first change.
